

Creating Your Horse

Breed Progression

Not every breed is available immediately. Breed access is unlocked gradually through rank progression.

Players can review unlocked breeds through:

`/menu > Progression > Breeds`

Creation Requirements

To complete horse creation successfully, all required fields must be selected and the entered values must be valid for the chosen breed.

Important fields include:

- Name
- Weight
- Height
- Age
- Breed

Permanent Choices

Horse creation choices are intended to be final. If an incorrect option is selected during creation, the horse's original attributes generally cannot be edited afterward.

Stat Variation

Created horses do not all spawn with identical stats. Instead, they are generated within a small stat range to provide variety between horses of the same breed.

This means two horses of the same breed may begin with slightly different strengths. Over time, those differences can be refined further through training and breeding.
