

Where to Check Your Horse's Condition

Most of the important information is shown in your horse menus.

Use your horse menu to view:

- **Welfare** for care, nutrition, cleanliness, hoof condition, and general health
- **Stats** for the horse's core traits and indicators
- **Daily Care** for care tasks that still need to be completed
- **Symptoms and Illnesses** indicators when something seems wrong

If you use `/horse view`, or left click your horse, that opens the main horse menu for your selected horse. From there, players can access the horse's welfare and stats pages.
