

☐☐ Selling Plots & Horses

Selling Horses

Horse sales are a direct player-to-player income source.

Use:

- `/horse sell <horse name> <player>`

important details:

- both players need to be online for the sale flow
- the buyer confirms the sale in-game
- not every horse is sellable

If you breed, train, or raise desirable horses, horse sales can become one of the highest-value money methods on the server.

Selling Plots

Plots can also be sold player-to-player through the plot system.

Use `/plot` to access your plot tools and menus. The current system supports selling a plot to another player with confirmation from both sides.

This is more of a bigger one-time payout than a daily method, but it can be excellent if enjoy building to sell.
