

☐☐Server Jobs

Server Jobs

One of the best long-term ways to make money is by joining an official server job. These are the career-style positions players apply for, and they can turn into a steady source of paid work and reputation.

Examples of server jobs include:

- Vet [/apply vet](#)
- Farrier [/apply farrier](#)
- Dentist [/apply dentist](#)
- Chiropractor [/apply chiro](#)
- Geneticist [/apply geneticist](#)

These jobs are ideal for players who want a more professional path on the server. Once you are accepted into one of these positions, your income usually comes from performing services for other players and being active in that field. Every operation gives xp toward your job role in which you can then rank up and earn more money and XP over time.
